NOTES

1 Adjust Control Values to suit
2 Put 1 in each box that each competitor finds
3 Put time in format min.sec eg 63 minutes 22 seconds would be 63.22, the calculation will sort the penalties
4 When all data inputted do a sort. If you are not familiar with this send me the file as you have inputted.
I will then do the sort to put people into the correct finish order.
I will then send it back to you for checking before publishing.
