

If you believe MapRunF has not punched all of the controls visited you have two options available to include these missing controls.

1. For these HOC events, if you have a GPS watch track available you can email your track to Paul Basher (prbasher@gmail.com) who will upload and use this instead of the MapRunF GPS trace.
2. MapRunF has an option for the runner to claim the missed controls. When viewing your results in the MapRunF App - select the top right menu options - and then choose HITMO

<http://maprunners.weebly.com/maprunf---review-results.html>

There is then an option to tick which controls you believe you have visited. This then can be uploaded as a new result. Admin would then review and allow or disallow as required.
