The aim of this exercise was to try and find controls which were placed somewhere between 2 points marked on the map. This clearly proved rather difficult and time consuming particularly in the dark. Needles in haystacks spring to mind !

The winner was the person who managed to find either all the controls and to get back in the quickest time (as in the short course) or if no competitor found all the controls (as in the medium and long courses) the person who found the most. I hope that those who took part enjoyed themselves.

Any queries or comments please contact Ian Gamlen COBOC Secretary and I will pass them on to Adrian Bailey – Planner
