

Shirley SMap Results

The first SMap of the season was an opportunity for people to remember the basics: bringing a head torch, remembering a phone, managing a new Maprun interface and, naturally, solving the enigma of how to get smart watches and Maprun to talk to each other.

Once these things were sorted, the evening went smoothly. The map presented an opportunity for people to do some good running with lots of route choice in a mostly flat event area which had a variety of paths and backdrops. Thanks for coming out SMapping!
