Planner's Comments

A unique experience for a planner: George complained that his course was too short!! Sorry if you felt cheated: I wanted to leave you some energy for the other courses on offer...

Congrats Tessa on out-sprinting all the lads ... we'll keep fingers crossed that you can achieve this kind of speed for Britain in the future.....

In the Microscopic-O, Russ sped round the 70 cm course in 17sec. This may sound impressive, but of course it equates to a speed of 1k in.... 7 hours! Now this might sound unimpressive, but of course Russ did visit 7 controls: if he'd continued with such orienteering skills, in that 7 hours he would have spiked 10000 controls....! Anyone want to compare Splits??

Thanks to Penny for the timekeeping.
