A special thanks to Alison who arrived after the mass start tired from mapping. She helped fill a space and did one of the courses and help collect controls. Also, to Barbara who helped giving out control descriptions and other tasks.

Well, I think it went well. The event had a MAY DAY theme of comradeship and queuing. Competitors had to be in pairs but had to change partners and maps at end of each course. However, there were only as many maps as partnerships. This lead to semi chaos as three Marx courses came in but could not change until Lenin or Engels course maps came to the change over.

One slight problem arose as I circle the wrong thicket on one map which caused three partnerships to have to find the thicket with the control. Sorry.

Having a mass start was a good idea as everyone was finished by 7.10.
