

Pitcher Oak Wood Summer Evening Event 07 May 2009 Results

I will ask Peter to publish these provisional results. If you find any errors please let me know and I will update a week from today Sat 9th. Some errors may have crept in because competitors did not fill in the start sheet with all the info, particularly the course they were running. If you haven't got a tick in the code it was not handed in for checking or you didn't put your name on it.

Thanks to all those who came, especially the Scouts, it makes all the hard work planning worth while. The fantastic weather brought out 47 competitors I ran out of all maps and had to hand write one blue, sorry for that.

More apologies:

1. For the flat control codes being the wrong way round I don't think it slowed anyone down too much.
2. The control on the tower was originally hung at its base I understand some lads moved it some 30' up the tower. It was quite a struggle to retrieve!
3. I haven't quite perfected the printing and the green undergrowth screen lines were a bit thick. Ocad will print the lines thinner but I didn't have time to experiment.

Most competitors on the longer courses seemed to enjoy running through the estate (any excuse to stay out of the brambles) the complexity made for fine orienteering and good route choice. Those inexperienced with sprint maps symbols thought the green was grass. It did print out slightly the wrong shade, it should have been more olive green but can I suggest looking at the key in future.

If the Scouts want another go the next event in Redditch is on the 9th July in Arrow Valley.

Finally thanks to those who volunteered to collect controls. John and Duncan Leeson, John Embrey and Peter Langmaid.
