Blue 2 only

Andy Clarke	NATO	M50	dfn
-------------	------	-----	-----

Let me start by thanking you all for turning up and making my efforts worth the while. Also a big “thank you” to John P, Mike B, and Peter L for helping to collect in the controls.

With the benefit of hindsight my courses were a touch on the long side. However, some of you romp around Clent as though it is flat while others find the hills rather slow going, as I did hanging the controls the night before! I hope the small SEE controls were relatively easy to spot but the bracken had shot up in the few weeks between taping the controls and the event itself.

At the end of the evening I checked the location of 3 on BLUE part 2 and I believe I hung it in the correct spot but an additional thicket has evolved just to the north of it which confused a few of you. As a consequence those who failed to find it have been reinstated in these results.

Lost items

1. Penny Hemsted who failed to download but I assume Andy found her (or he’s claimed the insurance money and left the country).
2. Thumb compass. (Please identify it as I have 2. One I know Dave lent to a newcomer but I don’t know which one).

Next event 9th June, Leasowes Park; Peter Langmaid.

Also note that the Lickey Hills event planned for 07/07/11 is now in question due to the outbreak of a plant disease. More information is available here; http://villageonline.co.uk/village/news/fullstory/lickey_hills_quarantine_alert
Please check our fixture list nearer the time.

Charlie Nelson (HOC)
