

Apologies for the late appearance of the results – this is purely due to managing to lose half of them for a while...

Thanks to all competitors for putting up with the lack of grid lines, and the interestingly old map (Pitcheroak would really benefit from being remapped, as some areas are now better orienteering than they were when originally mapped). On the short course control 11 caused problems (at least to those people who did not read the map like me – which is interestingly the majority), so I have allowed people to miss this out (out of fear of being lynched...).
