23 runners , including a first run for Oliver Collins, sweated it out on this humid evening, sharing the area with the local Brownie Pack. A fat finger mistyped a bigram which led to some confusion, most especially in the young runners on the Short course. Having arrived at the correct control, as the first letter did not match their expectations, they assumed they were at a different control and sought out *their* control, eventually giving up and not visiting their final control.

My error in misplacing in #PX (#7 on the Medium & #20 on the Long) meant that some searched wider and found the control in the wrong place, with others very sure of their location in the right re-entrant. I hope the amount of climb was not too overwhelming!

Thanks to John L, Peter L, Nigel C, Robert V and Ruth L for their assistance retrieving controls, which had taken much longer than I had planned to place out and Peter L again for interrogating the download box after the event to establish John Leeson's first lap time as he re-punched the start when he exchanged his map.
