The final WEE event of the season was at Kinver Edge, one of our best orienteering areas and the weather for the event was perfect, cold and dry. I designed the courses to try and avoid gratuitous climb and give many opportunities to cut the course if time was getting tight. One or two people, including the mapper had trouble with No. 20. I think the gorse had grown up somewhat around there. Must ask the mapper to check it out sometime before the next event there.

Unfortunately I didn't get much chance to discuss route choices and problems finding controls as I was trying to do both the event results and the League results. David again managed to get all the controls and win the event and Kerstin won the ladies event. Well done both. Sorry to Kerstin sending her out in the wet to get a control that had already been collected! Thanks very much to all those who did collect controls, Kerstin, Andy H, David W and especially Peter and Andy J who went over to the West side. To my surprise you all came back wet!
