With numbers depleted by half-term, COVID19, A trip to A&E and a rather hard hockey ball we were just 15 on Meadows and Top.

I tried to give folks a proper tour of the meadows – as few will have visited during the previous SEE – even if the navigation was, reasonably, straightforward. I'd like to suggest the stock control fences are upgraded to "uncrossable/do-not cross" on any updated map as the double top barbed wire strand and electric wire means climbing is only an option for the most agile (there was a warning in the pre-event details). If we could make use of the parking at the sports club or high school I'm sure we could get a WML out this area – few non-HOC orienteers will have visited.

Congratulations to James on getting within 7 seconds of night specialist and long time orienteer Ifor. Gold medal for timing goes to Robert Vickers. A couple of runners struggled with finding the finish – not sure what happened there.

Thank you to my control collectors and Peter for looking after the equipment for me – we were away by 20:40.
